Diseases of Warm Water Fish - FAS 5255

1 Overview

Diseases of Warm Water Fish is designed to provide instruction in the methodology of diagnosis, treatment and management of parasitic, bacterial, viral, nutritional, and environmental diseases of warm water food fish and aquarium species. This course is open to graduate and veterinary students, veterinarians, fisheries biologists, aquaculturists, and professional aquarists. The course is designed to provide basic instruction in fish biology and general husbandry, aquatic systems and water quality management, identification and interpretation of infectious agents impacting fish health, development of responsible and effective treatment plans, and consideration of biosecurity, quarantine and regulatory issues relevant to fish health.

- 3 credits
- Summer C
- 100% online
- http://elearning.ufl.edu/

Course Prerequisites: none

Instructor: Dr. Ruth Francis-Floyd, rffloyd@ufl.edu, (386) 643.8904.

- Please use the Canvas message/Inbox feature for fastest response.
- Office hours: available by email or phone M-F 8am-5pm; office visits available by appointment.

Co-Instructors: Dr. Denise Petty, pettyd@windstream.net, (386) 344.8363. Dr. Roy Yanong, rpy@ufl.edu, (813) 671.5230.

- Please use the Canvas message/Inbox feature for fastest response.
- Office hours: available by email or phone; office visits available by appointment.

Guest Lecturers:

Dr. Elizabeth Arnett-Chinn – Naples Zoo at Caribbean Gardens
Dr. Stephen Cassle - U.S. Army Veterinary Corps
Dr. Tonya Clauss – Georgia Aquarium
Ms. Debbi Crain – Consultant
Dr. Claire Erlacher-Reid – Sea World of Florida
Dr. Mark Flint – The Ohio State University
Ms. Theresa Floyd-Rump – Brammer Bio (Alachua, Florida)
Dr. Kathleen Hartman – USDA-APHIS
Dr. Jeff Hill – Tropical Aquaculture Lab, University of Florida
Dr. Kathy Heym – Florida Aquarium
Mr. Jim Kinsler – Sea World of Florida
Dr. Ed Noga – Southeastern Aquatechnologies
Dr. Andy Stamper – Disney Animal Programs
Dr. Natalie Steckler – Seastar Communications and Consulting LLC
Mr. Craig Watson – Tropical Aquaculture Laboratory, University of Florida
Textbook(s) and/or readings: All students must have access to Dr. Noga’s text, listed below. Some of the homework exercises may be difficult or impossible to complete without this text. Most of you will likely want to retain this book as part of your personal library. Dr. Roberts book is also strongly recommended.

REQUIRED:

RECOMMENDED:

SUPPLEMENTAL:

- Bacterial Diseases of Fish, by Inglis, Roberts and Bromages (Eds). 1993. Blackwell.
- Fish Diseases and Disorders, Volume 1: Protozoan and Metazoan Infections, by Woo (Ed), 1995, CAB International.
- Fish Diseases and Disorders, Volume 2: Non-Infectious Diseases, by Leatherland and Woo (Eds), 1998, CAB International.
- Fish Diseases and Disorders, Volume 3: Viral, Bacterial, and Fungal Infections, by Woo and Bruno (Eds), 1999, CAB International.
- Fish Medicine, by Stoskopf (Ed), 1993, Saunders.

2 Learning Outcomes

The goal of this class is to introduce students to basic concepts of fish health management including diagnosis of common infectious and non-infectious diseases, strategies for control of infectious disease and preventive health care for captive fish populations. Students will also be expected to develop a basic understanding of zoonotic diseases common in aquarium and cultured fish. Students will be expected to have a fundamental understanding of fish husbandry, disease prevention, be able to interpret findings of infectious disease, be familiar with regulated diseases of fish, understand principles of biosecurity, and quarantine, and appropriate treatment management, including regulations pertaining to use of drugs and chemicals by the time they complete the class.

At the end of this course, each student will be able to:
• Recognize normal and abnormal appearance of common families of warm water fish
• Understand common disease processes in major families of warm water fish, with emphasis on freshwater species.
• Understand basic physiologic processes of fish and how these may be altered by a diseased state.
• Evaluate normal anatomy (internal and external) of common species of warm water fish.
• Understand normal radiographic anatomy of common species of warm water fish.
• Apply diagnostic techniques used for basic examination of fish. This will include physical examination as well as routine tissue biopsies (gill, skin and fin) and techniques for microbial culture.
• Remember anatomical sites used for blood collection in common species of fish.
• Calculate proper treatment dosages for treating common fish diseases.
• Identify common fish parasites.
• Understand common bacterial, fungal and viral diseases of warm water fish.
• Create reasonable management and treatment plans to prevent or mitigate disease processes.
• Understand the basic components of a biosecurity program and apply these to quarantine protocols.
• Analyze water quality testing data.
• Create a problem list in which they define multiple factors contributing to a fish disease outbreak. They should be able to rank these factors in terms of the threat they pose to the affected population.
• Understand regulations that pertain to use of drugs and chemicals for treatment of fish diseases in the United States. This includes familiarity with the Food and Drug Administration’s web-based resources that support U.S. aquaculture industries.
• Understand regulations that pertain to infectious diseases of fish including species of concern, screening techniques, and required reporting.
• Remember zoonotic diseases of concern for aquarium and cultured warm water fish. They will also understand basic principles of personal protection.

3 Course Logistics

The on-line course will focus on delivery of didactic information using recorded lectures, discussion sections, assigned readings and projects. Lecture and course materials will be available on the course E-learning website.

Technology Requirements:

• A computer or mobile device with high-speed internet connection.
• A headset and/or microphone and speakers; a web cam is suggested.
• Latest version of web browser. Canvas supports only the two most recent versions of any given browser. [What browser am I using?]
3.1 Assignments & Deliverables
The course has been divided into six modules. There will be required homework and discussion sections for students along the way. There will be a quiz at the end of each module, and a final comprehensive exam at the end of the course. All assignments are open-book.

Homework

- There are 10 total homework assignments, one due each week except for the first and last week of the class. Problems consist of a mixture of multiple choice, true/ false and short answer including math problems.

Discussion Participation

- There is one “live discussion” for each module. Each “live discussion” is two hours and includes review of assignments, general discussion or material, and a short image quiz embedded in the program. Students are not required to participate “live” though it is recommended. The session is recorded and students unavailable to participate live can watch the recording and submit answers to the embedded assignment to Dr. Francis-Floyd.

Quizzes & Exams

- There is one quiz included at the end of each of the first five modules. All quizzes are open-book.
- There is a final comprehensive assignment that has been divided into three independent quizzes: one multiple choice, one image, and one short answer and problem solving. Each of these is open-book, however these three assignments are timed.

Group Project

- Students will be divided into groups of three or four by course instructors. Group assignments will be based on experience of individual students so that groups are as balanced as possible. For example, we try to include students with very little background in the field with students who may have several years of employment and substantial experience. We also work to blend veterinary and non-veterinary perspectives and experiences.

3.2 Grades & Grading Scale

20% Homework

10% Discussion Participation

30% Quizzes

Final Exam:

- Multiple choice exam (10%)
- Image exam (10%)
- Short answer and problem solving exam (10%)

10% Group Project

This course adheres to UF policies on grades and grade points: [https://catalog.ufl.edu/ugrad/current/regulations/info/grades.aspx](https://catalog.ufl.edu/ugrad/current/regulations/info/grades.aspx).

## 4 Course Content

### Learning Modules

**Module 1: Anatomy, Physiology and Taxonomy**  May 11-25, 2020

- Homework 1 due May 18, 2020
- Voicethread introduction due May 20, 2020
- Discussion May 21, 2020; 3-5 pm; Asynchronous assignment due May 25, 2020
- Quiz 1 due May 26, 2020

**Module 2: Treatment Options and Management Plans**  May 25- Jun 8, 2020

- Homework 2 due May 29, 2020
- Homework 3 due Jun 5, 2020
- Discussion Jun 4, 2020 3-5 pm; Asynchronous assignment due Jun 8, 2020
- Quiz 3 due Jun 9, 2020

**Module 3: Water Quality Analysis and Aquatic Systems**  Jun 8-22, 2020

- Homework 4 due Jun 12, 2020
- Homework 5 due Jun 19, 2020
- Discussion Jun 18 3-5 pm, Asynchronous assignment due Jun 21, 2020
- Quiz 3 due Jun 23, 2020

**Summer Break: Jun 22-Jul 6, 2020**

**Module 4: Nutrition, Husbandry and Biosecurity**  Jul 6-Jul 20, 2020

- Homework 6 due Jul 10, 2020
- Homework 7 due Jul 17, 2020
- Discussion Jul 16 3-5 pm; Asynchronous assignment due Jul 20, 2020
- Quiz 4 due Jul 21, 2020

**Module 5: Parasitic Diseases**  Jul 20- Aug 3, 2020

- Homework 8 due Jul 24, 2020
- Homework 9 due Jul 31, 2020
- Discussion Jul 30, 2020 3-5 pm; Asynchronous assignment due Aug 3, 2020
Quiz 5 due Aug 4, 2020

Module 6: Bacterial and Viral Diseases Aug 3 – 14, 2020

Homework 10 due Aug 7, 2020

Discussion Aug 10, 2020 3-5 pm; Asynchronous assignment due Aug 12, 2020

Final (comprehensive) multiple choice quiz due Aug 14, 2020

Final (comprehensive) image quiz due Aug 14, 2020

Final (comprehensive) short answer and problem solving quiz due Aug 14, 2020

Group Projects

Part 1 (water quality/husbandry) due Jun 12, 2020

Part 2 (infectious disease/treatment or management plan) due Aug 7, 2020

5 Policies and Requirements

This syllabus represents current plans and objectives for this course. As the semester progresses, changes may need to be made to accommodate timing, logistics, or to enhance learning. Such changes, communicated clearly, are not unusual and should be expected.

5.1 Late Submissions & Make-up Requests

It is the responsibility of the student to access on-line lectures, readings, quizzes, and exams and to maintain satisfactory progress in the course.

Assignments turned in late lose 10% per day, 50% at a week, and are not accepted after one week except as provided by University policy. Requirements for class attendance and make-up exams, assignments and other work are consistent with university policies that can be found at: https://catalog.ufl.edu/ugrad/current/regulations/info/attendance.aspx. Arrangements for late submission without penalty are routinely offered, but must be negotiated in advance on a case-by-case basis with Dr. Francis-Floyd.

Computer or other hardware failures, except failure of the UF e-Learning system, will not excuse students for missing assignments. Any late submissions due to technical issues MUST be accompanied by the ticket number received from the Helpdesk when the problem was reported to them. The ticket number will document the time and date of the problem. You MUST e-mail your instructor within 24 hours of the technical difficulty if you wish to request consideration.

For computer, software compatibility, or access problems call the HELP DESK phone number—352-392-HELP = 352-392-4357 (option 2).
5.2 Semester Evaluation Process
Student assessment of instruction is an important part of efforts to improve teaching and learning.

At approximately the mid-point of the semester, the School of Forest Resources & Conservation will request anonymous feedback on student satisfaction on various aspects of this course. These surveys will be sent out through Canvas and are not required, but encouraged. This is not the UF Faculty Evaluation!

At the end of the semester, students are expected to provide professional and respectful feedback on the quality of instruction in this course by completing course evaluations online via GatorEvals. Guidance on how to give feedback in a professional and respectful manner is available at https://gatorevals.aa.ufl.edu/students/. Students will be notified when the evaluation period opens, and can complete evaluations through the email they receive from GatorEvals, in their Canvas course menu under GatorEvals, or via https://ufl.bluera.com/ufl/. Summaries of course evaluation results are available to students at https://gatorevals.aa.ufl.edu/public-results/.

5.3 Netiquette: Communication Courtesy
All members of the class are expected to follow rules of common courtesy in all email messages, threaded discussions and chats. Failure to do so may result in loss of participation points and/or referral to the Dean of Students’ Office. http://teach.ufl.edu/wp-content/uploads/2012/08/NetiquetteGuideforOnlineCourses.docx

5.4 Academic Honesty Policy
As a student at the University of Florida, you have committed yourself to uphold the Honor Code, which includes the following pledge: “We, the members of the University of Florida community, pledge to hold ourselves and our peers to the highest standards of honesty and integrity.”

You are expected to exhibit behavior consistent with this commitment to the UF academic community, and on all work submitted for credit at the University of Florida, the following pledge is either required or implied: “On my honor, I have neither given nor received unauthorized aid in doing this assignment.”

It is assumed that you will complete all work independently in each course unless them instructor provides explicit permission for you to collaborate on course tasks (e.g. assignments, papers, quizzes, exams). Furthermore, as part of your obligation to uphold the Honor Code, you should report any condition that facilitates academic misconduct or appropriate personnel. It is your individual responsibility to know and comply with all university policies and procedures regarding academic integrity and the Student Honor Code. Violations of the Honor Code at the University of Florida will not be tolerated.

Violations will be reported to the Dean of Students Office for consideration of disciplinary action. For more information regarding the Student Honor Code, please see: http://www.dso.ufl.edu/sccr/process/student-conduct-honor-code.

5.5 Inclusive Learning Environment
This course embraces the University of Florida’s Non-Discrimination Policy, which reads,
The University shall actively promote equal opportunity policies and practices conforming to laws against discrimination. The University is committed to non-discrimination with respect to race, creed, color, religion, age, disability, sex, sexual orientation, gender identity and expression, marital status, national origin, political opinions or affiliations, genetic information and veteran status as protected under the Vietnam Era Veterans’ Readjustment Assistance Act.

If you have questions or concerns about your rights and responsibilities for inclusive learning environment, please see the instructor or refer to the Office of Multicultural & Diversity Affairs website: http://multicultural.ufl.edu.

5.6 Services for Students with Disabilities:
The Disability Resource Center coordinates the needed accommodations of students with disabilities. This includes registering disabilities, recommending academic accommodations within the classroom, accessing special adaptive computer equipment, providing interpretation services and mediating faculty-student disability related issues. Students requesting classroom accommodation must first register with the Dean of Students Office. The Dean of Students Office will provide documentation to the student who must then provide this documentation to the Instructor when requesting accommodation. 0001 Reid Hall, 352-392-8565, www.dso.ufl.edu/drc/

5.7 Software Use
All faculty, staff and students of the university are required and expected to obey the laws and legal agreements governing software use. Failure to do so can lead to monetary damages and/or criminal penalties for the individual violator. Because such violations are also against university policies and rules, disciplinary action will be taken as appropriate.

6 Campus Helping Resources
For issues with technical difficulties for e-learning in Canvas, please post your question to the Technical Help Discussion in your course, or contact the UF Help Desk at:

- Learning-support@ufl.edu | (352) 392-HELP - select option 2 | http://elearning.ufl.edu
- Library Help Desk support http://cms.uflib.ufl.edu/ask
- SFRC Academic Hub https://ufl.instructure.com/courses/303721

6.1 Student Life, Wellness, and Counseling Help
Students experiencing crises or personal problems that interfere with their general well-being are encouraged to utilize the university’s counseling resources. The Counseling & Wellness Center provides confidential counseling services at no cost for currently enrolled students. Resources are available on campus for students having personal problems or lacking clear career or academic goals, which interfere with their academic performance.

- Counseling and Wellness resources http://www.counseling.ufl.edu/cwc/
- U Matter, We Care http://www.umatter.ufl.edu/
- Career Connections Center http://career.ufl.edu/
- Other resources are available at http://www.distance.ufl.edu/getting-help for online students.
6.2 Student Complaint Process

The School of Forest Resources & Conservation cares about your experience and we will make every effort to address course concerns. We request that all of our online students complete a course satisfaction survey each semester, which is a time for you to voice your thoughts on how your course is being delivered.

If you have a more urgent concern, your first point of contact should be the SFRC Academic Coordinator or the Graduate/Undergraduate Coordinator for the program offering the course. You may also submit a complaint directly to UF administration:

- Students in online courses: [http://www.distance.ufl.edu/student-complaint-process](http://www.distance.ufl.edu/student-complaint-process)
- Students in face-to-face courses: [https://sccr.dso.ufl.edu/policies/student-honor-code-student-conduct-code/](https://sccr.dso.ufl.edu/policies/student-honor-code-student-conduct-code/)
