

Preliminary Syllabus August 25, 2014

FAS 6355c / FAS 4932 Fisheries Management

Course Syllabus, Fall 2014, 4/3 Credits

Lectures: Monday and Wednesday 09:00– 10:25 AM, 222 Newins-Ziegler Hall

Lab (graduate only): Monday 1:00 - 3:30 PM, 3096 McCarthy B (on-campus);

Tuesday 8:00-10:00 PM, Sakai Meeting (distance students)

Tutorial (undergraduate only): Wednesday 08:30– 09:00 AM, 222 Newins-Ziegler Hall

Course Description

Integrating scientific, social, political and legal factors in fisheries management.

Overview

Fisheries are an important source of food and recreational opportunities, yet many are in poor shape due to overfishing and/or habitat degradation. Managing fisheries sustainably and restoring fisheries that have been degraded is a complex task that requires a broad set of competencies from fisheries professionals. The course aims to help students develop key competencies including knowledge of essential ecological, social, institutional, and economic dimensions of fisheries management; skills in fisheries systems analysis, interview and social survey techniques, resource assessment and modeling, institutional analysis, participatory planning and reflection-in-action; and a repertoire of case studies. The course also aims to foster motivation for shared problem solving in an interdisciplinary and participatory manner, critical thinking and innovation. Lectures will be used to outline key concepts and approaches, and laboratories and homework assignments will provide experience in applying key methods. Throughout the course, all students will develop a case study on a fishery of their choice, applying what they have learned, providing concrete examples for class discussions, and eventually providing an independent review and recommendations for the further management of the fishery. Graduate students will also conduct an integrative, interdisciplinary group project to explore options for improving the management of a current fisheries issue. This interdisciplinary course is intended for graduate or undergraduate students majoring in any subject relevant to fisheries management including fisheries/aquatic science, wildlife, resource economics, geography, and political science.

Course Objectives

FAS 6355c & FAS 4932

- 1) Appreciate the complex, multi-dimensional nature of fisheries management problems and the benefits of integrative-interdisciplinary approaches to addressing them
- 2) Understand key relevant concepts in the areas of fisheries ecology, stakeholder

Preliminary Syllabus August 25, 2014

characteristics and behavior, governance systems, fisheries economics, and management and planning processes

- 3) Gain practical skills in fisheries assessment, interview techniques, institutional analysis, economic analysis, and participatory planning.
- 4) Gain practical experience in analyzing fisheries management issues in a problem- and outcome-oriented, interdisciplinary manner.

FAS 6355c only

- 5) Reflect on the wider management or conservation context of their research problem (or another issue of their choice)
- 6) Strengthen group work, communication, facilitation and reporting skills.

Teaching and learning approach

The course is designed to foster multi-disciplinary and integrative problem-solving skills in fisheries management. It starts off with structured lectures and labs/homework assignments, but progresses towards more open-ended, student-driven and often group-based learning.

From you as a student, the course requires enthusiasm for grappling with complex and poorly defined real-world fisheries management issues (“messes”). From graduate students, it further requires initiative and a willingness and ability work in groups (you will receive a substantial share of your grade based on group work). Many students enjoy these challenges but some don’t. If you want to be told what to do at all times, are uncomfortable engaging with problems that don’t have a right or wrong answer, or dislike group work then this course may not be for you.

The course is taught in mixed mode for both on-campus and distance students. On-campus and distance students will interact directly through a variety of electronic means and work collaboratively throughout the course.

Instructor

Dr. Kai Lorenzen (Professor), Fisheries and Aquatic Sciences, SFRC, 7922 71st Street, Gainesville, FL 32653. Phone 352-273 3646, Email: klorenzen@ufl.edu, Skype: kailorenzenuf
Web Page: <http://www.aquaticresources.org>.
Office hours: Mondays 10:30-12:00 AM at the NOAA-RTR, McCarthy B (or by arrangement)

Teaching assistant

Chelsey Crandall, Fisheries and Aquatic Sciences, SFRC, 7922 71st Street, Gainesville, FL 32653. Email: kicksea@ufl.edu . Office hours: by arrangement.

Guest lecturers

Preliminary Syllabus August 25, 2014

Dr. David Agnew, Marine Stewardship Council (fisheries certification)
Shepherd Grimes, Federal Fisheries Lawyer (fisheries law)
Dr. Sherry Larkin, Food and Resource Economics, UF (fisheries economics)
Dr. Martha Monroe, SFRC, UF (communication and education)
Dr. Taylor Stein, SFRC, UF (quantitative social surveys)
Dr. Juliane Struve, Fisheries and Aquatic Sciences, UF (habitat issues)

Mixed mode (on-campus and distance) delivery

The class will be offered in mixed on-campus/distance mode. Distance delivery is asynchronous.

All lectures and discussions will be automatically recorded by the UF Mediasite system. Recordings normally become available within 1-2 hours of each session.

All students must upload a personal introduction clip and an introduction clip about their case study fishery via the VoiceThread system. Distance students will also use voice thread to upload brief reflections on their case studies, presentations etc. throughout the course.

Arrangements for distance students for lab and discussion sessions will be discussed and agreed at the beginning of the course.

All participants are encouraged to maintain contact and discuss questions throughout the course using a suitable means agreed upon at the start of class (e.g. Sakai chat room, facebook, etc.).

E-learning and distance learning support

A Sakai site is available. Course material and interactive elements are organized as follows:

Announcements

- All important announcements are posted on the site and copied to your email.

Resources

- Access to resources such as lecture slides and key readings is via a Sakai web interface, organized by week. Lecture slides uploaded for sessions that have not yet been held are preliminary and are normally updated around the time a lecture is given (the course evolves constantly and so do the lectures!).
- Lecture recordings are automatically uploaded to the Mediasite catalog: <add>, We also make screen recordings as a backup and these will be made available via Sakai in cases where Mediasite recordings are unavailable.
- Coursework assignments are posted under *Assignments*. Please turn in your coursework through the *Assignments* functionality. (I will accept assignments submitted by email, but only under exceptional circumstances).

Preliminary Syllabus August 25, 2014

- You will receive feedback and grades through the same channel.

Voice Thread

- Use Voice Thread to upload and view clips, presentations etc.

Facebook group/chatroom

- Please use the course Facebook group to post questions and thoughts of general interest to the class. If you do not have a Facebook account, you will need to get one for the course (it's free!). (The reason for using Facebook is that the discussions are more easily accessible from mobile devices than Sakai– an important consideration for distance students).
- Post your questions for the discussion sessions here – by the previous day at the latest!

Assessment & Grading

Graduate

A variety of different assessment approaches will be used, with emphasis on evaluating understanding of key concepts, development of core skills, critical thinking, and creative problem solving. The different assessments and their weighting are:

Lab reports (5)	25%
Integrative review paper on case study	20%
Summary presentation on case study	10%
Fisheries management group project	30%
Participation in class	<u>15%</u>
Total	100%

Undergraduate

A variety of different assessment approaches will be used, with emphasis on evaluating understanding of key concepts, development of core skills, critical thinking, and creative problem solving. The different assessments and their weighting are:

Homework exercises (5)	40%
Policy paper on case study	20%
Summary presentation on case study	10%
Quizzes	15%
Participation in class	<u>15%</u>
Total	100%

Grading information

Preliminary Syllabus August 25, 2014

Grades will be allocated as: A (93 - 100 %), A- (90 - 92 %), B+ (86 - 89 %), B (82 - 85 %), B- (78 - 81 %), C+ (74 - 77 %), C (67 - 73 %), C- (63 - 66 %), D+ (59 - 62 %), D (55 - 58 %), D- (51 - 54 %), E (< 50 %).

Click here for UF grading information for students: <http://www.registrar.ufl.edu/hubstudents.html>

Coursework requirements

Introductory clips

All students are required to upload introductory clips about themselves and their case study to Voice Threat.

Lab reports (graduate) /homework assignments (undergraduate)

Lab sessions (graduate) and homework assignments (undergraduate) are designed to help students exercise key skills in fisheries assessment, interviewing, and bio-economic analysis. The graduate labs and undergraduate assignments will cover similar ground and are due within 2 weeks of the assignment being given.

Five lab/assignment reports are required:

- 1) Fisheries assessment I: biomass dynamics modeling (Individual reports).
- 2) Fisheries assessment II: dynamic pool models (Individual reports).
- 3) Qualitative stakeholder interviews (Group reports, 3 students per group).
- 4) Quantitative social surveys (Group reports by section: on-campus graduate, distance graduate, on-campus undergraduate).
- 5) Bio-economic modeling (Group reports, two students per group).

Depending on the lab/assignment, students will work and submit reports either individually or in groups. Group work enhances learning and helps prepare for the major group project. Reports should concisely address the questions posed in the assignments in writing, supported by pertinent figures and/or tables. It is not necessary to provide introductory material or describe methods, though knowledge and understanding of both should be evident in the presentation and interpretation of results. Individual lab reports will normally be around 3-5 pages in length, group reports may be longer.

Grading criteria: The report answers all questions posed in the assignment in a clear and concise manner. Text is supported by key figures and/or tables, all of which are appropriately labeled, described in a legend and referenced in the text. Interpretation of results shows good understanding of the underlying concepts and methods.

Preliminary Syllabus August 25, 2014

Report and presentation on case study

Throughout the course, all students will develop a case study on a fishery of their choice, applying what they have learned, providing concrete examples for class discussions, and eventually providing an independent review and recommendations for the further management of the fishery. Case studies will be used regularly in class discussions and distance students are asked to post regular reflections on their case study in the light of class topics online. The reporting requirements differ between the graduate and undergraduate sections:

Graduate: Graduate students prepare an in-depth analysis of their case study system in the format of a review paper for an academic journal, and a brief policy-brief style presentation.

Undergraduate: Undergraduate students prepare a report and presentation in policy brief format.

All reports will be peer-reviewed within the class prior to final submission.

Grading criteria: The report provides a clear, integrative and concise assessment of the fishery problem. Statements are appropriately supported by reference to publications, information from stakeholders, or personal observations. The report shows ability to synthesize and critically evaluate information. Limit: 2000 words. Due: 11/15/2014.

Fisheries policy group projects

In the group projects, students will work to provide a fresh, independent perspective on a current fisheries management problem. This will involve (1) identifying the problem and scoping the analysis; (2) in-depth analyses of the ecological, social, institutional and economic facets of the problem; and (3) proposing and evaluating possible solutions. Students will undertake integrative activities (1, 3) in a large group but may split into sub-groups for in-depth analyses (2) which may require modeling, stakeholder interviews, etc. The project will lead to a policy options paper (“green paper”) that will be shared with participating stakeholders and made publicly available. The mark for the group project will comprise elements awarded for sub-group analytical chapters (30% of total course mark) and for whole-group integrative elements (10% of total course mark). Project reports will be peer-reviewed within the class before final submission. Grading criteria: The report provides a clear, integrative and concise assessment of the fishery problem and policy options. Results are synthesized well and a management vision is clearly outlined. Methods are described in appropriate detail and all material is appropriately referenced. Limit: 4000 words for analysis chapter(s), 2000 words each for introduction and synthesis sections. Due: 12/10/14.

Participation in class

Preliminary Syllabus August 25, 2014

Students are expected to participate actively and constructively in class.

Grading criteria: On-campus students: Students make regular constructive contributions to class by asking pertinent questions, synthesizing knowledge and results, and taking on facilitation and leadership roles in class activities. Distance students: Students make regular constructive contributions in online discussions and lab meetings. Weight: 15 % of final grade.

Academic honesty

All students are required to abide by the Academic Honesty Guidelines which have been accepted by the University of Florida:

(<http://www.dso.ufl.edu/judicial/procedures/honestybrochure.html>).

Failure to comply strictly to these guidelines can result in failure of the course.

UF Counseling Services

Resources are available on-campus for students having personal problems or lacking clear career and academic goals which interfere with their academic performance. These resources include:

1. University Counseling Center, 301 Peabody Hall, 392-1575, personal and career counseling;
2. Student Mental Health, Student Health Care Center, 392-1171, personal counseling;
3. Sexual Assault Recovery Services (SARS), Student Health Care Center, 392-1161, sexual assault counseling; and
4. Career Resource Center, Reitz Union, 392-1601, career development assistance and counseling.

Accommodations for Students with Disabilities

Students requesting classroom or laboratory accommodation must first register with the Dean of Students Office. The Dean of Students Office will provide documentation to the student who must then provide this documentation to the Instructor when requesting accommodation.

Lecture and lab schedule

Note: details of the schedule may change in response to external circumstances or pedagogical needs of the course.

Week	Date	Topic	Recommended reading
1	8/25 Lecture	Introduction to the course. Introductions and discussion of student's interests and research	

Preliminary Syllabus August 25, 2014

		topics.	
	8/25 Lab	Group project (Session 1) Initial discussion on possible topics, interests, tasks, timeline	
	8/27 Lecture	Discussion I: Importance of fisheries, status and management challenges.	Gutierrez et al. 2011; Hilborn 2007b; Post et al. 2002; Welcomme et al 2010; Worm et al. 2009;
2	9/01 Lecture	Labor Day – no lecture	
	9/01 Lab	Labor Day – no lab	
	9/03 Lecture	Understanding fisheries systems	Degnbol & McCay 2006; Garcia & Charles 2007; Lorenzen 2008
3	9/08 Lecture	Qualitative interview studies	Acheson 1982; Weiss 1994; Kuehn et al. 2006; Adkins 2010; Turner 2010; Guion et al. 2011
	9/08 Lab	Qualitative interviewing lab	
	9/10 Lecture	Stakeholders as individuals: values, attitudes, assets and drivers of behavior	Salas & Gaertner 2004; Smith et al. 2005; Arlinghaus & Mehner 2006; Hutt & Bettoli 2007
4	9/15 Lecture	Quantitative social surveys (Taylor Stein)	Dillman et al. 2009
	9/15 Lab	Quantitative survey lab Fisheries assessment lab II	
	9/17 Lecture	Governance and management systems	Sutinen 1999; Hilborn et al. 2005; Ostrom 2007; Branch 2009; Fujita et al. 2010; Gutierrez et al. 2011, NOAA 2007
5	9/22 Lecture	Fisheries assessment I Biomass dynamics models	Hilborn & Walters 1992 (Ch. 8); Haddon 2001 (Ch. 10); Cooper 2006; Edwards et al. 2012
	9/22 Lab	Fisheries assessment lab I Group project (session 2)	
	9/24 Lecture	Fisheries Assessment II Dynamic pool models	Hilborn & Walters 1992 (Ch. 10); Haddon 2001 (Ch. 2, 11); Cooper 2006; Edwards et al. 2012

Preliminary Syllabus August 25, 2014

6	09/29 Lecture	Fisheries assessment III Fisheries management reference points, risk, management procedures	Charles 2001 (Ch. 11), Walters 2007; Hilborn 2007(a); Prager & Shertzer 2010; Edwards et al. 2012
	09/29 Lab	Fisheries assessment lab II	
	10/01 Lecture	Writing, presenting and peer review for policy vs. science audiences	Young & Quinn 2002; Pennock 2011
7	10/06 Lecture	Discussion II: Human dimensions in fisheries	
	10/06 Lab	Fisheries assessment lab III Review of Gulf Council SSC materials	
	10/08 Lecture	Gulf Council SSC Meeting (class will attend in person or via video link)	Documents will be on the FTP server at www.gulfcouncil.org
8	10/13 Lecture	Discussion III: Fisheries assessment and harvest management, Gulf Council visit	
	10/13 Lab	Group project (Session 3)	
	10/15 Lecture	The role of law in Federal fisheries management (Shepherd Grimes)	
9	10/20 Lecture	Economics of fisheries management (Sherry Larkin)	Milon et al. 1999; Conrad 1999 (Ch. 3)
	10/20 Lab	Bio-economic modeling lab (Sherry Larkin)	
	10/22 Lecture	Stakeholders engagement and stakeholders in governance (Chelsey Crandall)	Grimble & Wellard 1997; Pomeroy & Berkes 1997; Pomeroy & Rivera-Guieb 2006
10	10/27 Lecture	Reforming fisheries management: change and processes	McCay (1989); Grimes (1996); Harris et al. (2007); Shelley (2012)
	10/27 Lab	Group project (session 4)	
	10/29 Lecture	The role of fisheries professionals: science, art, and reflective practice	Sarewitz 2004; Schön 1983
11	11/03 Lecture	Communication strategies for working with stakeholders (Martha Monroe)	Kaplan & Kaplan 2009, Monroe et al. 2009
	11/03 Lab	Group project (session 5)	

Preliminary Syllabus August 25, 2014

	11/05 Lecture	Habitat in fisheries management (Juliane Struve)	Langton et al. 1996; Levin & Stunz 2005
12	11/10 Lecture	Spatial fisheries management and marine spatial planning	Fogarty & Botsford 2007; Lorenzen et al. 2010(a)
	11/10 Lab	Group project (session 6)	
	11/12 Lecture	Ecosystem-based fisheries management	Francis et al. 2006; Hobday et al. 2011
13	11/17 Lecture	Discussion IV: Reforming fisheries management	
	11/17 Lab	Group project (session 7)	
	11/19 Lecture	Dealing with external pressures: habitat, water allocation, pollution	Irwin & Freeman 2002; Lorenzen et al. 2006; Irwin, E.R. & Mickett Kennedy, K.D. 2008
14	11/24 Lecture	Managing recreational fisheries	Post et al. 2002; Arlinghaus et al. 2007; Johnston et al. in press
	11/24 Lab	Group project (session 8)	
	11/26 Lecture	Day before Thanksgiving – no class	
15	12/01 Lecture	Sustainability certification of fisheries products (David Agnew)	
	12/01 Lab	Group project (session 9)	
	12/03 Lecture	Where there is no data and no government: managing small-scale fisheries in developing countries	Allison & Ellis 2001; Prince 2010; Cochrane et al. 2011.
16	12/08 Lecture	TBD	
	12/08 Lab	Group project (session 10)	
	12/10	Discussion V: Class synthesis	

Textbooks

There are no required text books, but students may refer to the following for many aspects of the course:

Charles, A.T. 2001. *Sustainable Fishery Systems*. Wiley-Blackwell, London.
Haddon, M. 2001. *Modelling and Quantitative Methods in Fisheries*. Chapman and Hall, London. (Or more recent editions.)

Preliminary Syllabus August 25, 2014
