Plant Water Relations Techniques - FOR 6345C, Section 019B – Spring 2012 Syllabus

Instructors: Dr. Tim Martin (359 N-Z, 846-0866, tamartin@ufl.edu), Dr. Carlos Gonzalez (352W N-Z, 846-0851, cgonzabe@ufl.edu)

Class Meetings: Wednesdays, periods 4-6 (10:40 – 1:40), 219 Newins-Ziegler Hall

Office Hours: After class on Wednesdays, or by appointment; If my office door is open and I'm not meeting with someone, you are always welcome to drop in.

Course web site: http://www.sfrc.ufl.edu/class/FOR6345

Course description: This two credit course will focus on instruments and techniques used to quantify water balance and status in plants in the field. Emphasis will be placed on the theory, assumptions, advantages and shortcomings of various measurement techniques.

Objectives: To familiarize graduate students with some of the tools necessary to measure plant water relations parameters in the field. Emphasis will be on water potential measurements with Scholander pressure chambers, leaf gas exchange measurements with porometers and infrared gas analyzers, and xylem sap flux measurements with heat dissipation probes.

Text: Readings and handouts will be distributed throughout the semester in class. See Reading List at end of Syllabus

Course Grades:
Course evaluations will be based on the following items

<table>
<thead>
<tr>
<th>Task</th>
<th>% of total course points</th>
</tr>
</thead>
<tbody>
<tr>
<td>Participation</td>
<td>50</td>
</tr>
<tr>
<td>Class Project</td>
<td>30</td>
</tr>
<tr>
<td>Annotated Bibliography</td>
<td>20</td>
</tr>
</tbody>
</table>

Participation - Students are expected to attend all class meetings, participate in lab activities, and contribute to course discussion.

Annotated Bibliography – Choose a water relations technique that is of interest to you or that is important for your research – it can be a technique we learned in class or some other. Create an annotated bibliography of at least 15 peer-reviewed papers that have used this technique. For each paper, provide a paragraph or two which describes how the technique was used and how the technique contributed to the goals of the paper. The bibliography (by hard copy or e-mail) is due at the beginning of class on March 28. No late bibliographies will be accepted.

Final Project – During the last two class meetings, we will conduct a field exercise in which we apply a number of the techniques learned in class. The class will be broken into small “teams”, each of which will be responsible for a set of measurements. The data will be collated and distributed to the class. Each student will independently analyze and report the data from all measurements. The project (by hard copy or e-mail) is due by 5:00 p.m. on April 30. No late projects will be accepted.
Final grades will be assigned as:

- 90-93.3% A-
- 93.4-96.6 A
- 96.7-100 A+
- 80-83.3% B-
- 83.4-86.6 B
- 86.7-89.9 B+
- 70-73.3% C-
- 73.4-76.6 C
- 76.7-79.9 C+
- 60-63.3% D-
- 63.4-66.6 D
- 66.7-69.9 D+
- Less than 60% E (Fail)

Tentative Course Schedule

<table>
<thead>
<tr>
<th>Date</th>
<th>Topic</th>
<th>Date</th>
<th>Topic</th>
</tr>
</thead>
<tbody>
<tr>
<td>Jan. 11</td>
<td>Course introduction; syllabus; discussion of student expectations and needs; review of plant water relations concepts [Martin]</td>
<td>Mar. 7</td>
<td>UF Spring Break – No Class</td>
</tr>
<tr>
<td>Feb. 1</td>
<td>Introduction to gas exchange measurements; theory and configuration of gas exchange systems; introduction to LiCor 6400 photosynthesis system [Martin]</td>
<td>Mar. 28</td>
<td>Introduction to dataloggers; multiplexers; sensor hookup; programming [Martin]</td>
</tr>
<tr>
<td>Feb. 8</td>
<td>LiCor 6400 tutorial; stomatal conductance measurements; calculation of gas-phase limitations to photosynthesis [Martin]</td>
<td>April 4</td>
<td>Introduction to xylem sap flow measurements; heat pulse velocity; tissue heat balance; heat dissipation [Gonzalez]</td>

Partial Reading List

*Useful texts*

Kirkham, M.B. 2004. Principles of Soil and Plant Water Relations. Academic Press. [similar to Kramer and Boyer, better coverage of more recent techniques]

Slavik, B. 1974. Methods of studying plant water relations. Springer. [good coverage of water relations theory]
Tyree, M.T., and M.H. Zimmermann. 2002. Xylem structure and the ascent of sap. Springer. [highly readable, seminal overview of xylem structure and function]

Papers

UNIVERSITY OF FLORIDA POLICIES YOU NEED TO KNOW:

ACADEMIC HONESTY: As a result of completing the registration form at the University of Florida, every student has signed the following statement: I understand that the University of Florida expects its students to be honest in all their academic work. I agree to adhere to this commitment to academic honesty and understand that my failure to comply with this commitment may result in disciplinary action up to and including expulsion from the University.

UNIVERSITY SUPPORT SERVICES: Resources are available on-campus for students having personal problems or lacking clear career and academic goals which interfere with their academic performance. These resources include:

1. University Counseling Center, 301 Peabody Hall, 392-1575, personal and career counseling
2. Student Mental Health, Student Health Care Center, 392-1171, personal counseling
3. Sexual Assault Recovery Services (SARS), Student Health Care Center, 392-1161, sexual counseling
4. Career Resource Center, Reitz Union, 392-1601, career development assistance and counseling

SOFTWARE USE: All faculty, staff and students of the University are required and expected to obey the laws and legal agreements governing software use. Failure to do so can lead to monetary damages and/or criminal penalties for the individual violator. Because such violations are also against the University policies and rules, disciplinary action will be taken as appropriate.

ACCOMODATIONS FOR STUDENTS WITH DISABILITIES: Students requesting classroom accommodation must first register with the Dean of Students Office. The Dean of Students Office will provide documentation to the student who must then provide this documentation to the Instructor when requesting accommodation.
