COMMUNICATION: I will be teaching “live” via ZOOM from my private office in Lakeland, to all four campuses. We must work together to overcome the disconnect caused by a 4-campus class discussion, and you are encouraged to speak up and keep the course lively. This is to be a DISCUSSION course. You will be graded on your participation, insight and input on the issues we discuss. I live and work in Polk County, so it is easiest to reach me via email and cell phone when you have questions or need assistance. Our “Classroom” is ufl.zoom.us/j/8128578300
TEXTBOOK: Required Text: *Evidence and Procedures for Boundary Location*
Sixth Edition, Robillard, Wilson, Brown

Note: Prerequisite courses required *Boundary Control and Legal Principles*, Brown, Robillard, Wilson, and this text will be an additional reference.

Supplementary Materials, Exhibits and Handouts will be distributed for lectures and labs. CADD-equipped and internet-accessible workstation/laptop is required for labs. Field Trips require travel and rigorous outdoor work.

OBJECTIVES: As one of the final courses of the Geomatics Program, this course will explore and discuss practical applications of geomatics principles and theories, aimed at students entering the Surveying and Mapping Profession. Further, this course aligns with the students’ professional goals of licensure as a Professional Surveyor and Mapper.

LECTURE/LAB TIMES AND DAYS: Typically, Lectures will be 9:35am to 10:25am on Tuesdays and Thursdays, with Lab/Discussion Sessions from 3:00pm to 6:00pm on Wednesdays. There are many exceptions to the usual schedule as there are several out-of-town and weekend field trips. Pay close attention to the weekly schedule, and note that students must provide their own transportation for the field trips. ACTIVE ATTENDANCE, PARTICIPATION, AND DISCUSSION IS MANDATORY.

ATTENDANCE AND CLASS DEMEANOR: This course will deal in practical applications and requires student/class interaction and discussion. Again, class participation is a significant portion of your grade. Talk to me. Think. Discuss. Debate. Attendance at ALL lectures, ALL labs and ALL field trips is mandatory, and attendance will be taken at the beginning of each session. Exceptions may be granted at the Instructor’s sole discretion for extreme hardship.

Working students are advised to setup internet/camera connections for ALL lectures for participation. It is only two 50-minute windows in the week, and can be easily done from the workplace. It is NOT advisable to skip lectures and merely review the recordings. Many of the Labs and ALL of the Field Trips require your physical attendance, not merely an “online” presence.

This is a professional-level course and classroom demeanor is expected to conform to business office practices. Therefore distractions such as texting, internet surfing and cell phone use is not acceptable during lectures and discussion sessions.

Graduates of this class will be entering the workforce, and students will be expected to produce professional deliverables in a timely manner. You will be introduced to the leadership of this profession on several field trips and appropriate attire is mandatory. That is a jacket and tie for the gentlemen and professional office attire for the ladies.

ASSIGNMENTS, DELIVERABLES AND DEADLINES: Welcome to the Profession! Deadlines are absolute (a 3:00pm deliverable is marked LATE at 3:01pm). Due dates and times will be announced when assignments are given. Strict attention to deadlines is required, just as it will be in your future practice of Surveying and Mapping.

All assignments must be successfully and fully completed and turned in to pass the course. Again, to pass this class, ALL work must be successfully and thoroughly completed and turned in. Late work delivered within 24 hours of the deadline will result in a 20% score reduction on delivery. Work delivered any later than 24 hours will be docked an additional 10%. All work must be turned in to pass this course, but any submittals over one week late will receive a score of zero. Incomplete submittals will be returned, and regardless of score, all assignments MUST be thoroughly and satisfactorily completed to pass this course.

And, a final “Lesson Learned”. Clearly label all submittals with your name and date and assignment title on the center top of the front page. I will not link your email to the attached document. Likewise, .pdf file names should include your name and assignment title.

ACCOMODATIONS FOR STUDENTS WITH DISABILITIES: Students requesting classroom accommodation must first register with the Dean of Students Office. The Dean of Students Office will provide documentation to the student who must then provide this documentation to the Instructor when requesting accommodation.
ASSESSMENT METHODS: Current UF grading policies for assigning grade points may be reviewed at https://catalog.ufl.edu/ugrad/current/regulations/info/grades.aspx. Grading will be weighted approximately as follows:

THE FS (SIT) and PS (PSM) EXAMS:

The majority of our Geomatics students plan to take the NCEES Fundamentals of Surveying (FS) Exam after completing this course or near the end of the semester. Our course is structured to follow the content of the exam to prepare the student for licensure.

The Fundamentals (FS) exam and the Principles and Practice (PS) exam are both now offered year-round through computer based testing (CBT). The National Council of Examiners for Engineering and Surveying (NCEES) is responsible for administering both the FS and PS exams, and you may direct all of your questions regarding exam registration and procedures to NCEES. Find out more by visiting www.ncees.org.

The Florida Jurisdictional exam is now being offered through the Florida Board of Professional Surveyors and Mappers office. They offer the paper and pencil, 100 question multiple choice exam four to six times per year in different locations throughout the state. Please visit their website to view the exam dates and locations, as well as the registration information.

Please note: In order to register for any of the exams (FS, PS and Florida Jurisdictional), you must have submitted a registration application and been approved by the Board.
