

Aquatic Invertebrate Ecological Physiology

(Marine Adaptations)

FAS 6154 (3 credits) Fall, 2014

Course Description

This course will examine and compare the physiological adaptations of marine, coastal, and estuarine organisms to environmental conditions. The processes examined will span several levels of organization, from ecological and organismal to cellular and molecular. Examples will be drawn from rocky intertidal, salt marsh, coral reef, and deep sea habitats, among others.

Prerequisites: BSC 2010 and 2011 or equivalent; courses in animal physiology and ecology are recommended.

Instructor

Dr. Shirley Baker

Email: sbaker25@ufl.edu

Telephone: 352-273-3627 (office)

Office: Fisheries and Aquatic Sciences, 7922 NW 71st St

Office hours: By appointment at Millhopper or main campus

Teaching assistant

Ken Black

Email: kwblack@ufl.edu

Student Learning Outcomes

At the end of this course, each student will be able to:

- Describe the basic principles and key mechanisms of physiological adaptation in a variety of phyla
- Compare the physiology of organisms adapted to marine, coastal, and estuarine environments
- Apply critical thinking in evaluating literature of the discipline
- Analyze the underlying importance of physiology in ecological patterns observed in communities and ecosystems

Course Meeting Times T 7-8 (1:55-3:50), R 8 (3:00-3:50)

Required Texts/Readings

1. There is no required textbook for this course. However, the following textbook is highly recommended; reading appropriate sections before the corresponding lecture will help clarify the topics discussed. This book can be purchased new, used, as an e-book, or as a rental, from a variety of online vendors.

Willmer, Pat, Graham Stone, and Ian Johnston. 2005. *Environmental Physiology of Animals*, 2nd Edition. Wiley-Blackwell.

2. Relevant readings from journals or other media will be posted for discussion.

Class Format, Policies on Attendance and Make-up Exams

Course format:

This course will consist primarily of lecture and discussion periods. Students are expected to have read assigned materials prior to corresponding class sessions.

Attendance policy:

Regular attendance and participation in lecture and discussion periods is expected. Absent students are responsible for acquiring missed lecture notes.

Make-up policy:

Make-up exams will be considered on a case-by-case basis and will only be given under exceptional circumstances. Students must request permission to make up an exam *prior to* the exam date, with no exceptions. Without prior permission, a missed exam will receive a score of "0". *Late assignments will have 10 points deducted for every day late.*

Assignments

Literature Discussion & Participation: During most Thursday class sessions, the class will discuss papers from the primary literature. Students will be expected to actively participate in *every discussion*. Unexcused absences will result in a score of zero for that day's discussion session.

Discussion Leadership: Twice during the semester, individuals will be expected to lead the class discussion session. Literature will be related to that week's topic. Two papers will be discussed: One will be chosen by Dr. Baker, the other will be chosen by the student. The selected article must be provided one week prior to the session.

Assignments: Students will develop a “**Species Profile**” over the course of the semester. Each of six assignments must be submitted to the e-learning platform by 6 pm on specific Sundays (see schedule). The assignment will be graded, edited, and returned. When submitting the next assignment (e.g., Assignment #2), students are expected to submit the new section as well as correct the previous section (e.g., Assignment #1). Each assignment will add one (or more) paragraphs to the Species Profile. Scientific literature must be cited; no web sites may be used.

- Assignment #1: Species description and habitat
- Assignment #2: Reproduction and life history strategies
- Assignment #3: Feeding and digestion
- Assignment #4: Salt and water balance
- Assignment #5: Respiration, oxygen transport, and circulation
- Assignment #6: Thermal adaptations

Exams: Each of two exams will *primarily* cover the material since the last exam. Exams will consist of short answer questions and short essays. Questions will require critical thinking, integration, and application of interdisciplinary concepts. Sample exams will be provided.

Graduate student presentations: Graduate students will present their Species Profile to the class as a lecture of at least 20 minutes, followed by a question and answer period.

Evaluation of Student Learning

Exams, two @ 100 points each	200 points
Assignments, six @ 50 points each	300 points
Presentation, one @ 100 points each	100 points
Leadership, two discussion sessions @ 50 points	100 points
<u>Participation, 13 discussion periods @ 10 points each</u>	<u>130 points</u>
TOTAL	830 points

Grading Scale

Final grades will be assigned based on the percentage of total points earned. For additional information on UF grading policies, see <https://catalog.ufl.edu/ugrad/current/regulations/info/grades.aspx>

- A = 90-100% = 747-830 points
- B+ = 85-89% = 705-746 points
- B = 80-84% = 664-704 points
- C+ = 75-79% = 623-663 points
- C = 70-74% = 581-622 points
- D = 60-69% = 498-580 points
- F = < 60% = <497 points

Schedule			
Week	Date	Weekly Topic	Assignments
1	26 August	Overview, expectations, introductions	
	28	Habitats	
2	2 September	Phyla	
	4	<i>Literature Discussion</i>	<i>Assignment #1</i> Due Sunday 6pm
3	9 September	Biomechanics and life in fluid	
	11	<i>Literature Discussion</i>	
4	16 September	Reproduction and life history strategies	
	18	<i>Literature Discussion</i>	
5	23 September	Energy metabolism	
	25	<i>Literature Discussion</i>	<i>Assignment # 2</i> Due Sunday 6pm
6	30 September	Feeding and digestion	
	2 October	<i>Literature Discussion</i>	
7	7 October	Symbioses	
	9	EXAM I	<i>Assignment # 3</i> Due Sunday 6pm
8	14 October	Salt and water balance	
	16	<i>Literature Discussion</i>	
9	21 October	Respiration	
	23	<i>Literature Discussion</i>	
10	28 October	Oxygen transport and circulation	
	30	<i>Literature Discussion</i>	<i>Assignment # 4</i> Due Sunday 6pm
11	4 November	Oxygen limitation	
	6	<i>Literature Discussion</i>	
12	11 November	Diving physiology	
	13	<i>Literature Discussion</i>	<i>Assignment # 5</i> Due Sunday 6pm
13	18 November	Thermal adaptations	
	20	<i>Literature Discussion</i>	

14	25 November	Graduate student presentations	
	27	<i>Thanksgiving</i>	
15	2 December	Deep sea & Polar seas	
	4	<i>Literature Discussion</i>	<i>Assignment #6</i> Due Sunday 6pm
16	9 December	EXAM II	

Additional References

Background material for two of the lectures, *Life in Fluid* and *Symbioses*, is not available in the recommended Willmer et al. text book. Therefore, it is suggested that the following materials be read before the corresponding lectures to help clarify the topics. These books can be purchased new, used, as an e-book, or as a rental, from a variety of online vendors. Older editions may be available in the UF library.

1. Levinton, Jeffrey S. 2009. *Marine Biology; Function, Biodiversity, Ecology*, 3rd Edition. Oxford University Press.
2. Nybakken, James W. and Mark D. Bertness. 2005. *Marine Biology; An Ecological Approach*, 6th Edition. Pearson Benjamin Cummings.

Other Information

Academic Honesty, Software Use, UF Counseling Services, Services for Students with Disabilities

In 1995 the UF student body enacted an [honor code](#) and voluntarily committed itself to the highest standards of honesty and integrity. When students enroll at the university, they commit themselves to the standard drafted and enacted by students.

In adopting this honor code, the students of the University of Florida recognize that academic honesty and integrity are fundamental values of the university community. Students who enroll at the university commit to holding themselves and their peers to the high standard of honor required by the honor code. Any individual who becomes aware of a violation of the honor code is bound by honor to take corrective action. The quality of a University of Florida education is dependent upon community acceptance and enforcement of the honor code.

The Honor Pledge: We, the members of the University of Florida community, pledge to hold ourselves and our peers to the highest standards of honesty and integrity.

On all work submitted for credit by students at the university, the following pledge is either required or implied: "**On my honor, I have neither given nor received unauthorized aid in doing this assignment.**"

The university requires all members of its community to be honest in all endeavors. A fundamental principle is that the whole process of learning and pursuit of knowledge is diminished by cheating, plagiarism and other acts of academic dishonesty. In addition, every dishonest act in the academic environment affects other students adversely, from the skewing of the grading curve to giving unfair advantage for honors or for professional or graduate school admission. Therefore, the university will take severe action against dishonest students. Similarly, measures will be taken against faculty, staff and administrators who practice dishonest or demeaning behavior.

Students should report any condition that facilitates dishonesty to the instructor, department chair, Student Honor Council, or Student Conduct and Conflict Resolution in the Dean of Students Office.

(Source: 2011-2012 Undergraduate Catalog)

It is assumed all work will be completed independently unless the assignment is defined as a group project, in writing by the instructor.

This policy will be vigorously upheld at all times in this course.

Software Use:

All faculty, staff and students of the university are required and expected to obey the laws and legal agreements governing software use. Failure to do so can lead to monetary damages and/or criminal penalties for the individual violator. Because such violations are also against university policies and rules, disciplinary action will be taken as appropriate.

Campus Helping Resources

Students experiencing crises or personal problems that interfere with their general well-being are encouraged to utilize the university's counseling resources. The Counseling & Wellness Center provides confidential counseling services at no cost for currently enrolled students. Resources are available on campus for students having personal problems or lacking clear career or academic goals, which interfere with their academic performance.

Students with Disabilities

The Disability Resource Center coordinates the needed accommodations of students with disabilities. This includes registering disabilities, recommending academic accommodations within the classroom, accessing special adaptive computer equipment, providing interpretation services and mediating faculty-student disability related issues.
